ISS Role-Based Test Checklists

This document provides manual test checklists for these user roles:

- `Admin`
- `Procurement`
- `Sales`
- `Finance`
- `Service`

It is intended for UAT, regression testing, and user training.

Validated against the current backend authorization attributes on March 15, 2026.

How To Use This Document

1. Create one test user per role.
2. Give each user only the single role being tested.
3. Use a prepared baseline dataset so the role user can focus on business actions instead of system setup.
4. Test both:
    - what the role should be able to do
    - what the role should not be able to do

Important note:

- the frontend sidebar is broadly shared
- backend API authorization is the true enforcement layer
- a restricted user may still see some links, but they must not be able to successfully use restricted pages or actions

Baseline Data To Prepare Before Role Testing

Prepare this once using an `Admin` user:

- at least one warehouse
- at least one item and UoM

- one supplier
- one customer
- default currencies
- default payment types
- default tax codes
- default reference forms

Recommended sample data:

Type	Sample
Warehouse	`MAIN`
Supplier	`SUP1`
Customer	`CUS1`
Item	`SKU1 - Hydraulic Filter`
UoM	`PCS`

Role Scope Summary

Role	Main allowed areas	Typical blocked areas
`Admin`	All modules	None by design
`Procurement`	suppliers, taxes, reference forms, PR, RFQ, PO, GRN, direct purchase, supplier invoice, supplier return	users, notifications, currencies, AR/AP, payments, service work order pages
`Sales`	customers, taxes, reference forms, quotes, orders, dispatches, direct dispatches, invoices, customer returns, equipment units, jobs, estimates, handovers	users, procurement pages, finance pages, currencies, work orders, QC, material requisitions
`Finance`	customers, suppliers, currencies, currency rates, payment types, taxes, tax conversions, reference forms, AR/AP, payments, credit notes, debit notes, direct purchases, supplier invoices, invoices	users, notifications, audit logs, reporting pages, PO/GRN, most service pages

Role	Main allowed areas	Typical blocked areas
`Service`	customers, taxes, reference forms, equipment units, jobs, work orders, estimates, material requisitions, quality checks, handovers, direct dispatches	users, procurement, currencies, payments, AR/AP, audit logs, reporting

Admin Checklist

Use this role to verify full-system access and role setup.

Access Smoke

- ☐ Sign in successfully.
- ☐ Open `Dashboard`.
- ☐ Open `Master Data -> Items`.
- ☐ Open `Procurement -> Purchase Orders`.
- ☐ Open `Sales -> Invoices`.
- ☐ Open `Service -> Work Orders`.
- ☐ Open `Finance -> Payments`.
- ☐ Open `Reporting -> Costing`.
- ☐ Open `Admin -> Users`.
- ☐ Open `Audit Logs`.

Expected result:

- all pages load without authorization errors

User And Role Management

- ☐ Open `Admin -> Users`.
- ☐ Create one user each for `Procurement`, `Sales`, `Finance`, and `Service`.
- ☐ Verify the user appears in the list.
- ☐ Change one user role assignment.
- ☐ Reset one user's password.
- ☐ Sign in with the updated user to confirm the password reset worked.

Expected result:

- user creation, role update, and password reset all succeed

Admin Operations

- [ ] Open `Admin -> Import`.
- [ ] Download the Excel import template.
- [ ] Upload either a valid test file or an intentionally invalid file to confirm validation feedback.
- [ ] Open `Admin -> Notifications`.
- [ ] Verify queued notifications can be listed.
- [ ] If a retryable item exists, run the retry action.
- [ ] Open `Settings`.

Expected result:

- import tools work
- notification list loads
- settings page opens

Cross-Module System Checks

- [ ] Create or edit one master-data record.
- [ ] Create one procurement document.
- [ ] Create one sales document.
- [ ] Create one service document.
- [ ] Create one finance document.
- [ ] Open one PDF from each area touched.
- [ ] Confirm `Audit Logs` records the actions.

Expected result:

- admin can complete full-system operations end to end

Negative Check

- [ ] Sign in as a non-admin user created by admin.
- [ ] Confirm the non-admin user cannot successfully use `Admin -> Users`.
- [ ] Confirm the non-admin user cannot successfully use `Admin -> Notifications`.

Expected result:

- non-admin user is blocked from admin-only features

Procurement Checklist

Use a user with only the `Procurement` role.

Allowed Access Smoke

- [ ] Sign in successfully.
- [ ] Open `Master Data -> Suppliers`.
- [ ] Open `Master Data -> Tax Codes`.
- [ ] Open `Master Data -> Reference Forms`.
- [ ] Open `Procurement -> Purchase Reqs`.
- [ ] Open `Procurement -> RFQs`.
- [ ] Open `Procurement -> Purchase Orders`.
- [ ] Open `Procurement -> Goods Receipts`.
- [ ] Open `Procurement -> Direct Purchases`.
- [ ] Open `Procurement -> Supplier Invoices`.
- [ ] Open `Procurement -> Supplier Returns`.

Expected result:

- all listed pages load and show usable data

Core Procurement Flow

- [ ] Create a purchase requisition.
- [ ] Add at least one line.
- [ ] Submit and approve the PR if the test path requires both actions.
- [ ] Convert the approved PR to a purchase order.
- [ ] Open the resulting PO and verify the supplier, item, and quantity.
- [ ] Approve the PO.
- [ ] Create a goods receipt from the PO.
- [ ] Add a GRN line and post it.

Expected result:

- PR, PO, and GRN flow completes without validation or authorization errors

Additional Procurement Flows

- [ ] Create an RFQ and add a line.

- [ ] Send the RFQ.
- [ ] Create a direct purchase and post it.
- [ ] Create a supplier invoice and post it.
- [ ] Create a supplier return and post it.

Expected result:

- each document follows the expected status transition

Document Quality Checks

- [ ] Open one procurement detail page in draft status.
- [ ] Add a line.
- [ ] Edit the line.
- [ ] Save the line.
- [ ] Delete the line if the document is still draft.
- [ ] Download at least one procurement PDF.
- [ ] Add one comment or attachment if collaboration is present on the page.

Expected result:

- draft line actions work
- PDF opens
- collaboration actions save successfully where available

Downstream Impact Checks

- [ ] Confirm a posted GRN creates AP visibility for finance.
- [ ] Confirm a posted direct purchase increases stock.
- [ ] Confirm a supplier return reduces stock or adjusts supplier balance as designed.

Expected result:

- procurement documents cause the expected business impact

Negative Access Checks

- [ ] Attempt to open `Admin -> Users`.
- [ ] Attempt to open `Finance -> Payments`.
- [ ] Attempt to open `Finance -> AR`.
- [ ] Attempt to open `Master Data -> Currencies`.

- [ ] Attempt to open `Service -> Work Orders`.

Expected result:

- procurement user cannot successfully use those restricted screens

Sales Checklist

Use a user with only the `Sales` role.

Allowed Access Smoke

- [ ] Sign in successfully.
- [ ] Open `Master Data -> Customers`.
- [ ] Open `Master Data -> Tax Codes`.
- [ ] Open `Master Data -> Reference Forms`.
- [ ] Open `Sales -> Quotes`.
- [ ] Open `Sales -> Orders`.
- [ ] Open `Sales -> Dispatches`.
- [ ] Open `Sales -> Direct Dispatches`.
- [ ] Open `Sales -> Invoices`.
- [ ] Open `Sales -> Customer Returns`.
- [ ] Open `Service -> Equipment Units`.
- [ ] Open `Service -> Jobs`.
- [ ] Open `Service -> Estimates`.
- [ ] Open `Service -> Handovers`.

Expected result:

- all listed pages load and are usable

Core Sales Flow

- [ ] Create a quote and add a line.
- [ ] Send the quote.
- [ ] Create a sales order and add a line.
- [ ] Confirm the order.
- [ ] Create a dispatch from the order if the workflow requires it.
- [ ] Add lines and post the dispatch.
- [ ] Create a sales invoice.

- [ ] Add at least one line and post the invoice.

Expected result:

- quote, order, dispatch, and invoice statuses update correctly

Direct Sales And Returns

- [ ] Create a direct dispatch.
- [ ] Add a line and post it.
- [ ] Create a customer return against the customer or invoice path used by the team.
- [ ] Add a line and post it.

Expected result:

- stock issues and returns behave correctly
- invoice or AR-related downstream records are created where expected

Shared Sales-Service Checks

- [ ] Create or view an equipment unit.
- [ ] Create a service estimate and add a line.
- [ ] Send or approve the estimate.
- [ ] Create or update a service job.
- [ ] Open a handover and confirm the page works.

Expected result:

- sales user can use the shared customer/service screens allowed by the API

Document Quality Checks

- [ ] On one draft sales document, test line `Add`, `Edit`, `Save`, `Cancel`, and `Delete`.
- [ ] Download one sales PDF.
- [ ] Add one comment or attachment on a supported sales detail page.

Expected result:

- draft editing, PDF output, and collaboration work correctly

Negative Access Checks

- [ ] Attempt to open `Admin -> Users`.
- [ ] Attempt to open `Procurement -> Purchase Orders`.
- [ ] Attempt to open `Finance -> Payments`.
- [ ] Attempt to open `Master Data -> Currencies`.
- [ ] Attempt to open `Service -> Work Orders`.
- [ ] Attempt to open `Service -> Quality Checks`.

Expected result:

- sales user is blocked from those restricted areas

Finance Checklist

Use a user with only the `Finance` role.

Allowed Access Smoke

- [ ] Sign in successfully.
- [ ] Open `Master Data -> Customers`.
- [ ] Open `Master Data -> Suppliers`.
- [ ] Open `Master Data -> Currencies`.
- [ ] Open `Master Data -> Currency Rates`.
- [ ] Open `Master Data -> Payment Types`.
- [ ] Open `Master Data -> Tax Codes`.
- [ ] Open `Master Data -> Tax Conversions`.
- [ ] Open `Master Data -> Reference Forms`.
- [ ] Open `Finance -> Accounts Receivable`.
- [ ] Open `Finance -> Accounts Payable`.
- [ ] Open `Finance -> Payments`.
- [ ] Open `Finance -> Credit Notes`.
- [ ] Open `Finance -> Debit Notes`.
- [ ] Open `Procurement -> Direct Purchases`.
- [ ] Open `Procurement -> Supplier Invoices`.
- [ ] Open `Sales -> Invoices`.

Expected result:

- all listed pages load and show usable data

AR And AP Checks

- [ ] Open `Finance -> AR` and confirm outstanding invoice balances are visible.
- [ ] Open `Finance -> AP` and confirm outstanding supplier balances are visible.
- [ ] Toggle any available outstanding/all filters.
- [ ] Open at least one linked source document from AR or AP.

Expected result:

- balances and links load correctly

Payments And Allocations

- [ ] Create an incoming payment for a customer.
- [ ] Allocate it to an AR entry.
- [ ] Confirm the remaining balance decreases correctly.
- [ ] Create an outgoing payment for a supplier if AP test data exists.
- [ ] Allocate it to an AP entry.

Expected result:

- payment totals, allocated amounts, and remaining amounts are accurate

Credit And Debit Notes

- [ ] Create a credit note.
- [ ] Allocate it where the business flow supports allocation.
- [ ] Create a debit note.
- [ ] Confirm the affected AR or AP values update correctly.

Expected result:

- finance adjustment documents save and affect balances correctly

Shared Finance-Document Checks

- [ ] Open one supplier invoice.
- [ ] Open one sales invoice.
- [ ] Download one finance-related PDF.
- [ ] Verify document numbers and totals match the screen.

Expected result:

- shared document review works from the finance role

Negative Access Checks

- [ ] Attempt to open `Admin -> Users`.
- [ ] Attempt to open `Admin -> Notifications`.
- [ ] Attempt to open `Audit Logs`.
- [ ] Attempt to open `Reporting -> Costing`.
- [ ] Attempt to open `Procurement -> Purchase Orders`.
- [ ] Attempt to open `Procurement -> Goods Receipts`.
- [ ] Attempt to open `Service -> Work Orders`.

Expected result:

- finance user is blocked from those restricted areas

Service Checklist

Use a user with only the `Service` role.

Allowed Access Smoke

- [ ] Sign in successfully.
- [ ] Open `Master Data -> Customers`.
- [ ] Open `Master Data -> Tax Codes`.
- [ ] Open `Master Data -> Reference Forms`.
- [ ] Open `Service -> Equipment Units`.
- [ ] Open `Service -> Jobs`.
- [ ] Open `Service -> Work Orders`.
- [ ] Open `Service -> Estimates`.
- [ ] Open `Service -> Material Reqs`.
- [ ] Open `Service -> Quality Checks`.
- [ ] Open `Service -> Handovers`.
- [ ] Open `Sales -> Direct Dispatches`.

Expected result:

- all listed pages load and are usable

Core Service Flow

- [ ] Create an equipment unit for a customer.
- [ ] Create a service job.
- [ ] Update the job through at least one status change.
- [ ] Create a work order.
- [ ] Create a service estimate and add at least one line.
- [ ] Send or approve the estimate.

Expected result:

- equipment, job, work order, and estimate workflows are usable by the service role

Parts And Quality Flow

- [ ] Create a material requisition.
- [ ] Add a line and post it.
- [ ] Record a quality check.
- [ ] Create a handover or open an existing handover.
- [ ] If the handover-to-invoice path is used, confirm the conversion action works or is correctly restricted by process.

Expected result:

- service documents move through their intended workflow without authorization failures

Shared Service-Sales Check

- [ ] Open `Sales -> Direct Dispatches`.
- [ ] Create a direct dispatch if the service team uses it for parts issue.
- [ ] Add a line and post it.

Expected result:

- service role can use the shared direct-dispatch capability

Document Quality Checks

- [ ] On one draft service document, test line `Add`, `Edit`, `Save`, `Cancel`, and `Delete`.
- [ ] Add one comment or attachment on a supported service detail page.
- [ ] Download one service-related PDF if available on the tested page.

Expected result:

- draft line editing and collaboration features work on service documents

Negative Access Checks

- [ ] Attempt to open `Admin -> Users`.
- [ ] Attempt to open `Procurement -> Purchase Orders`.
- [ ] Attempt to open `Finance -> Payments`.
- [ ] Attempt to open `Finance -> AR`.
- [ ] Attempt to open `Master Data -> Currencies`.
- [ ] Attempt to open `Audit Logs`.
- [ ] Attempt to open `Reporting -> Costing`.

Expected result:

- service user is blocked from those restricted pages

Role-Test Sign-Off Template

Use one row per role:

Role	Tester	Date	Allowed flows passed	Negative checks passed	Open defects	Status
Admin						
Procurement						
Sales						
Finance						
Service
